VAL-EPA-000804 through VAL-EPA-000806: INFORMATION REQUEST RESPONSE

2. For each of the flaring events described in response to Request 1 of this letter, provide a copy of the incident investigations conducted by the Facility and the notifications and/or reports submitted by the Facility to the National Response Center, EPA, state and local agencies.

6. For each flare system at the Facility, provide the following:
- a. A description of the operation and design of the related equipment such as knockout drums, compressors, scrubbers, vessels, and dump stacks;

- b. The safe operating limits.

- c. The maximum and design capacities in pounds per hour and millions of standard cubic feet per day;

**PRIVILEGED &
CONFIDENTIAL**

[REDACTED]

[REDACTED]

[REDACTED]

- e. The most recent completed Process Hazard Assessment;

[REDACTED]

- f. Piping and Instrumentation Diagram(s) ("P&IDs") that identifies the unit PRDs associated with the flare; and

[REDACTED]

- g. A list of the process unit PRDs associated with the flare, including the design case flow rate and set points for the PRD. Please identify the PRDs using the same identifiers found on P&IDs.

[REDACTED]

7. Provide a list and description of all the process units and indicate which have uninterruptable/universal power supply systems and which do not.
